SUMMARY

Data Science and Analytics professional with hands-on experience in data analysis, machine learning, NLP, and LLM-based applications. Proven ability to build end-to-end data solutions, deploy AI-powered chatbots, and deliver business insights using Python, SQL, Power BI, and ML frameworks. Experienced in handling large-scale datasets, model optimization, and vector databases, with strong academic and internship background.

EDUCATION

Jain (Deemed-to-be University), Bengaluru

Sep 2024 – Present

MSc in Data Science and Analytics

Presidency College, Bengaluru

Sep 2021 – July 2024

Bachelor of Computer Application, CGPA: 8.9/10

WORK EXPERIENCE

NLP & GenAI Intern 

Feb 2025 – May 2025

NullClass

Bengaluru

- Built and deployed advanced **NLP** and LLM-based chatbots using Google **PaLM**, Gemini AI, and open-source models, enabling multiple capabilities within a strict 3-month project timeframe.
- Developed a research assistant chatbot trained on **80,000+ academic papers**, capable of summarization, semantic search, and complex question answering using Streamlit.
- Implemented a dynamic knowledge base update system using **FAISS** vector database, allowing auto-information gain.
- Communicated with mentor to deploy chatbots, gaining hands-on experience on fine-tuning and **pipeline** management.

Business Analyst Intern

March 2024 – May 2024

DataMites™

Bengaluru

- Cleaned and transformed raw business data using **MySQL** and Python, reducing data inconsistencies by **30%**
- Created interactive dashboards in **Power BI**, visualized sales trends and customer behavior across **3** business regions.
- Led data **exploration** and created user stories from client cases, maintained clear communication with the team.

PUBLICATIONS

An Innovative Approach to Face Recognition Attendance System 

Department of Data Analytics & Mathematical Sciences, JAIN (Deemed-to-be University)

Kaushal Sahu.

- Developed a real-time facial recognition system using **YOLO V9**, enhancing college attendance efficiency by **40%**.
- Collected multi-angle facial images to create a custom dataset, improving recognition accuracy to over **95%**.
- Contributed to the field of Computer Vision and **AI-powered** surveillance system portable and light weight product.
- Presented research at academic seminars, receiving positive feedback on applying edge computing, wearable AI.

SKILLS

Programming Languages: Python, SQL, R

Data Analysis: Data Cleaning, EDA, Statistical Analysis

Machine Learning: Scikit-learn, Model Evaluation, Time Series Analysis

Deep Learning & NLP: OpenCV, Natural Language Processing (NLP), Large Language Models (LLMs)

BI & Visualization Tools: Power BI, Tableau

CERTIFICATIONS

Analyzing and Visualizing Data with Microsoft Power BI - Microsoft (April 2024)

IBM Data Science Professional Certificate - Coursera (October 2023)

Intermediate Machine Learning - Kaggle (April 2023)
